Education

Bachelor's Degree in Networks and Computer Systems Engineering | Tishreen University, Latakia, Syria | Dec 2022

Graduation Project: Evaluating performance of Software Defined Networking controllers (SDN) , based on deferent parameters (payload, response time, number of hosts)

Main Projects

Full-Stack E-Commerce Shop

I built a Full-stack online shop using React.js, Node.js and EXPRESS, implementing a dynamic cart which gets finalized with payment using stripe.js. Link: <https://shopinonline.netlify.app/store>

Furniture Shop

I created an online furniture shop using Vanilla JavaScript, HTML, CSS, and local storage to save the cart. Link: <https://monumental-cascaron-a2cc2b.netlify.app>

Restaurant Meal Search

I used MealDB API to build a restaurant meal search by ingredient name. Link: <https://bucolic-douhua-579d59.netlify.app>
